

KOZLODUY NPP EAD FIRE SAFETY MANAGEMENT POLICY

Kozloduy NPP EAD applies its fire safety management policy to ensure fire safety as a component of the nuclear and general safety in implementing the Company's activities.

THE FIRE SAFETY MANAGEMENT POLICY IS FOCUSED TOWARDS ACHIEVING THE FOLLOWING OBJECTIVES:

- effective protection of the personnel and production process from fire and combustion products
- protection of nuclear facilities, nuclear material and radioactive substances from fire and combustion products
- preventing and/or limiting to the highest degree the risks of fire
- enhancing the personnel practical knowledge of ensuring fire safety
- maintaining the Management System consistency with the provisions of GSR Part 2 “Leadership and Management for Safety”, the applicable statutory and regulatory requirements, and requisites adopted by the stakeholders

THE FOLLOWING PRINCIPLES UNDERLIE THE FIRE SAFETY MANAGEMENT IN THE COMPANY:

- observing the national legislation requirements regarding fire safety
- sustaining and cultivating a strong fire safety culture
- prevention of fires
- prompt fire detection and suppression
- limiting fire spread

The Kozloduy NPP EAD Management implements the fire safety policy management by applying a set of engineering, technical and organisational arrangements for fire protection defence-in-depth.

Kozloduy NPP EAD managers at all levels are committed to maintaining and improving fire safety performance results, aligning and engaging personnel in contributing to the effectiveness of the Company's management system.

The fire safety management policy is communicated to all the Company's employees and each of them is responsible to implement its principles in their efforts towards achieving the set objectives.
