NL	Installatievoorschrift		

INSTALLATION INSTRUCTIONS

<p>DE/DI</p>			
<p>XE/XI</p>			

DANGER OF INJURY! Media under high pressure can cause significant injury. Before removing actuator or valve parts, the system pressure must be lowered to ambient pressure. The valves are to be installed by skilled personnel and in strict accordance with the installation instructions and local regulations. RESIDEO assumes no responsibility for damages or injuries resulting from non-compliance with installation instructions or standard good practice when mounting, operating, or maintaining the valves, even if not explicitly mentioned in the installation instructions. Proper use: These valves are only for use in closed cold, warm, and hot water circuits and (depending upon the given valve) for closed steam applications. They are designed for a medium temperature range of from 2 to 120 or 170 °C, as well as for a max. pressure of 16 bar. They are to be operated with the appropriate RESIDEO actuators, only. Please refer to specification data. The installation of a strainer is strongly recommended.

RISQUE DE BLESSURE! Les supports soumis à une forte pression peuvent provoquer de graves blessures. Avant de retirer des actionneurs ou des vannes, la pression du système doit être abaissée à la pression ambiante. Ces vannes doivent impérativement être installées par du personnel qualifié habilité et scrupuleusement suivant nos instructions de montage et en accord avec la législation locale. RESIDEO ne peut être tenu pour responsable des dommages ou nuisances éventuels occasionnés, par le non respect de nos instructions ou des règles de l'art que se soit au montage, en service ou durant la maintenance même si cela ne figure pas explicitement dans nos instructions de montage. Ces vannes sont utilisables uniquement dans des circuits fermés d'eau froide, chaude ou de chauffage et, suivant les modèles, pour des applications vapeurs en circuit fermé. Leur plage d'utilisation soit de +2 à 120 °C ou 170 °C et avec une pression différentielle maxi. de 16 bars. Elles doivent être actionnées uniquement par les servomoteurs RESIDEO appropriés. Voir nos spécifications. Nous recommandons l'installation d'un filtre.

¡RIESGO DE LESIONES! Los medios sometidos a altas presiones pueden provocar lesiones graves. Antes de quitar el piezas de la válvula o del actuador, la presión del sistema se debe reducir hasta la presión ambiental. Las válvulas deben ser instaladas por personal cualificado estrictamente de acuerdo con las instrucciones de montaje y de acuerdo con la normativa local. RESIDEO no asume responsabilidad alguna por daños o perjuicios que resulten de la falta de seguimiento a las instrucciones de instalación o de las prácticas habituales en el montaje, operación y mantenimiento, incluso cuando estas prácticas habituales no estén específicamente mencionadas en las instrucciones de instalación. Estas válvulas se puede utilizar solamente en circuitos cerrados de agua fría o caliente y también - según la válvula - en circuitos cerrados calentado por vapor. Están diseñadas para un rango medio de temperatura de 2 a 120 °C y pueden llegar a 170 °C. La presión máxima es de 6 bar. Están diseñadas para funcionar de forma adecuada con el apropiado actuador RESIDEO solamente. Por favor, ajústese a las especificaciones de la hoja de datos técnicos. Se recomienda imprescindiblemente el montaje de colectores de impurezas.

PERICOLO DI LESIONI! I liquidi sotto pressione elevata possono provocare lesioni gravi. Prima di rimuovere l'attuatore o i componenti della valvola, la pressione del sistema deve essere portata a pressione ambiente. Le valvole possono essere montate solo da personale opportunamente addestrato nel rispetto delle istruzioni di montaggio e delle leggi vigenti nel Paese. RESIDEO non assume alcuna responsabilità civile per danni o lesioni dovuti alla non osservanza delle istruzioni di montaggio, delle avvertenze e delle misure precauzionali durante installazione, esercizio e manutenzione, anche se non viene fatto esplicito riferimento nelle istruzioni. Impiego: Le valvole sono adatte solo per l'impiego in impianti chiusi con acqua fredda e calda, come pure in impianti chiusi a vapore. Sono realizzate per temperature comprese fra 2 °C e 120–170 °C e per una pressione di max. 6 bar. Devono essere azionate solo con attuatori RESIDEO. Riferirsi alle specifiche tecniche. Si consiglia di installare assolutamente un filtro trattenitore.

FARE FOR PERSONSKADE! Medier under højt tryk kan medføre alvorlig personskade. Systemtrykket skal sænkes til det omgivende tryk, før aktuatoren eller ventildelene fjernes. Ventilene må kun installeres af fagfolk og udtrykkeligt som anført i installationsvejledningen samt i henhold til lokale regulativer. RESIDEO påtager sig ikke ansvar, og har ikke erstatningspigt for skader opstået fra fejlagtig installation, betjening eller manglende vedligeholdelse. Disse ventiler må primært kun bruges i lukkede koldt og varmtvandsystemer men dog i særlige tilfælde også til lukkede damp applikationer. De er designet til en medie temperatur fra 2 °C og op til 120/170 °C med et maksimum tryk på 6 bar. De bør kun anvendes med tilhørende RESIDEO motorer. Venligst se specifikations data. Indbygningen af smudssier anbefales ubetinget.

VERLETZUNGSGEFAHR! Medien unter hohem Druck können schwere Verletzungen verursachen. Vor der Demontage des Antriebs oder von Ventilbauteilen muss der Systemdruck unbedingt auf den Umgebungsdruck gebracht werden. Die Ventile dürfen nur von ausgebildeten Fachkräften unter Beachtung der Montageanweisung und der örtlichen gesetzlichen Bestimmungen montiert werden. RESIDEO übernimmt keine Verantwortung für Schäden oder Verletzungen, die durch Nichtbefolgen der Montageanweisung oder Nichtbeachten der üblichen Sorgfalt und Vorsicht bei Montage, Betrieb oder Wartung verursacht werden, selbst wenn sie nicht ausdrücklich in der Montageanweisung enthalten sind. Bestimmungsgemäßer Einsatz: Die Ventile sind ausschließlich zum Einsatz in geschlossenen Kalt-, Warm- und Heißwasser-Kreisläufen, sowie je nach Type in geschlossenen dampfbeheizten Anlagen geeignet. Sie sind ausgelegt für Temperaturen zwischen 2 °C und 120 °C bzw. 170 °C und einen Druck von max. 16 bar. Sie dürfen nur mit passenden Antrieben von RESIDEO betrieben werden. Beachten Sie die technischen Daten. Der Einbau von Schmutzfängern ist unbedingt empfohlen.

GEVAAR VOOR LETSEL! Onderdelen die onder hoge druk staan kunnen ernstig letsel veroorzaken. Voordat u de aandrijving of kleponderdelen verwijderd, moet u de druk op het systeem verlagen tot de omgevingsdruk. De afsluiters moeten volgens de installatie instructies door een erkend installateur geïnstalleerd worden volgens de lokale bepalingen. RESIDEO neemt geen verantwoordelijkheid voor beschadigingen of ongevallen als resultaat van een foutieve installatieprocedure. Deze afsluiters zijn alleen geschikt voor gesloten systemen met koud, warm of heetwater als medium. Enkele typen zijn geschikt voor gesloten stoomtoepassingen. De afsluiters zijn ontworpen voor mediumtemperaturen van 2 tot 120/170°C (type-afhankelijk). De afsluiters geschikt voor een maximale druk van 6 bar. De afsluiters moeten worden aangestuurd met de in de product informatie opgegeven RESIDEO servomotoren. De montage van dpatschermen wordt met aandrang aanbevolen.

FARE FOR SKADE! Medier under høyt trykk kan forårsake betydelig skade. Før du fjerner aktuator- eller ventildeler, må systemtrykket reduseres til det omgivende trykket. Ventilene må kun monteres av utdannede fagfolk i samsvar med montasjeveiledningen og de lokale lovbestemmelsene. RESIDEO påtar seg intet ansvar for materielle skader eller personskader som oppstår ved at montasjeveiledningen ikke følges eller ved at den vanlige omhyggelighet og forsiktighet vedmontasje, drift og vedlikehold ignoreres, selv om dette ikke er uttrykkelig nevnt i montasjeveiledningen. Korrekt anvendelse: Ventilene er utelukkende bestemt for bruk i stengte kaldt- og varmtvannskretsløp så vel som, avhengig av typen, i stengte dampoppvarmede anlegg. De er konstruert for temperaturer mellom 2 °C og 120 til 170 °C og et trykk på maks. 6 bar. De må kun drives med passende drifter fra RESIDEO. Vær oppmerksom på de tekniske data. Vi vil absolutt anbefale å montere smussfangere.

RISK FÖR SKADA! Media vid högt tryck kan orsaka svår skada. Innan du tar bort driftöden eller ventildelar måste trycket i systemet sänkas till omgivande lufttryck. Ventilerna måste installeras av kunnig personal och strikt följa installationsvisningen och gällande bestämmelser. RESIDEO tar inget ansvar om skador uppstår PGA att medföljande anvisningar inte följs vid installation, drift och service eller om okvalificerad personal utfört arbetet, även om anvisningarna följs. Dessa ventiler är endast för användning i stängd kyl, värme och hetvattenkretsar och vissa ventilmodeller även för stängd ångapplikationer. Ventilerna är designade för en medium temperaturgräns från 2 till 120 °C och upp till 170 °C om trycket är maximum 6 bar för ventilen. Ventilerna skall användas endast till RESIDEO ställdon, se specifikation. Montering av smutsfångare är absolut att rekommendera.

TAPATURMAN VAARA! Paineistetut aineet voivat aiheuttaa vakavan vamman. Ennen käyttölaitteen tai venttiilin osien poistamista järjestelmän paine on laskettava ympäristön ilmanpaineen tasolle. Venttiileiden asennuksen saa suorittaa vain ammattitaitoinen asentaja noudattaen asennusohjeita sekä paikallisia turvallisuusmääräyksiä. RESIDEO ei vastaa henkilö- eikä materiaalihavainoista, jotka johtuvat huolimattomuudesta tai asennusohjeiden laiminlyönnistä, asennuksessa, käytössä tai huollossa, vaikka tästä ei olisi asennus-ohjeessa erikseen mainittukaan. Käyttöalue: Nämä venttiilit soveltuvat käytettäviksi suljetuissa kylmä-, lämmin- ja kuumavesikiertoputkistoissa, sekä riippuen tyypistä myös suljetuissa höyrylämmitysjärjestelmissä, käyttölämpötila-alue 2 °C - 120°C tai 170°C. Painemaksimi 6 bar, toimialueita saa käyttää vain RESIDEO toimittamia toimilaitteita. Olkaa hyvä, ja noudattakaa teknisiä ohjeita. Suosittelemme ehdottomasti lianerotimen asennusta.

Centra Linear Valve XE/XI

3-way Linear Valve

APPLICATION

Single seated control or shut-off 3-way linear valve for:

- Hot water
- Chilled water

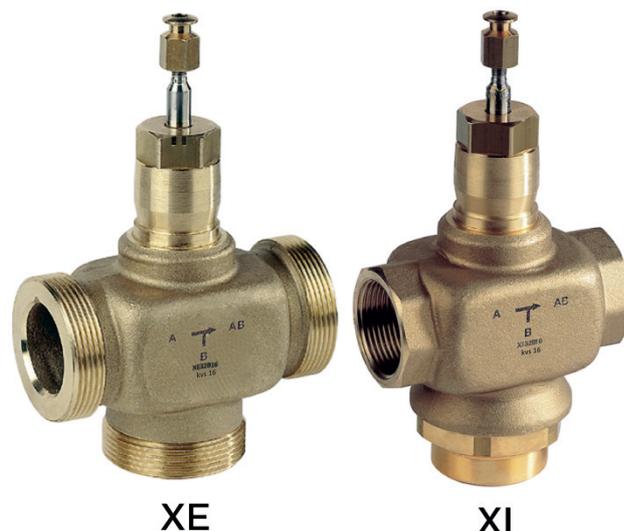

in heating, ventilation, air conditioning systems, and open circuits.

Operated by

- electric linear actuators series ML64... and ML74...

SPECIAL FEATURES

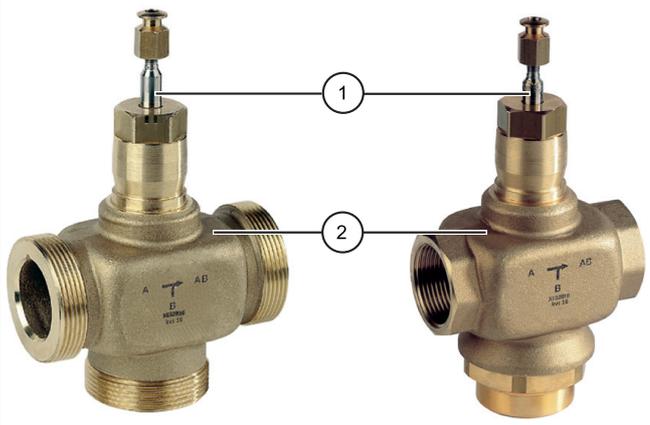

- Brass body with external threaded end connections (type XE)
- Brass body with internal threaded end connections (type XI)
- Low seat leakage rate
- Self-adjusting packing
- Accurate positioning to ensure state-of-the-art temperature control
- Constant total flow throughout full plug travel

TECHNICAL DATA

Media	
Medium:	Water or glycol-water mixture, according to VDI 2035
Operating temperatures and operating pressure	
2 to 120 °C:	max. 1600 kPa
120 to 170 °C:	max. 1490 kPa
Max. temperature differential in alternating hot/cold water use:	60 K
Connection/Sizes	
Pipe connection:	Internal threading as per ISO 228 External threading as per DIN 2999
Specifications	
Action:	Stem up to close port A-AB
Nominal pressure rating:	PN16
Flow characteristic:	equal percentage: port A-AB linear: port B-AB
Rangeability:	50:1
Leakage rate:	≤0.05% of k_{vs}
Stroke:	20 mm

CONSTRUCTION

Overview	Components	Materials
	1 Stem	Stainless steel
	2 Valve body	Brass
	Not depicted components:	
	Seat	DN15: stainless steel DN20..50: body integrated
Plug	Brass	
Packing	Spring-loaded carbon fiber reinforced PTFE V-rings	

INSTALLATION GUIDELINES

Setup requirements

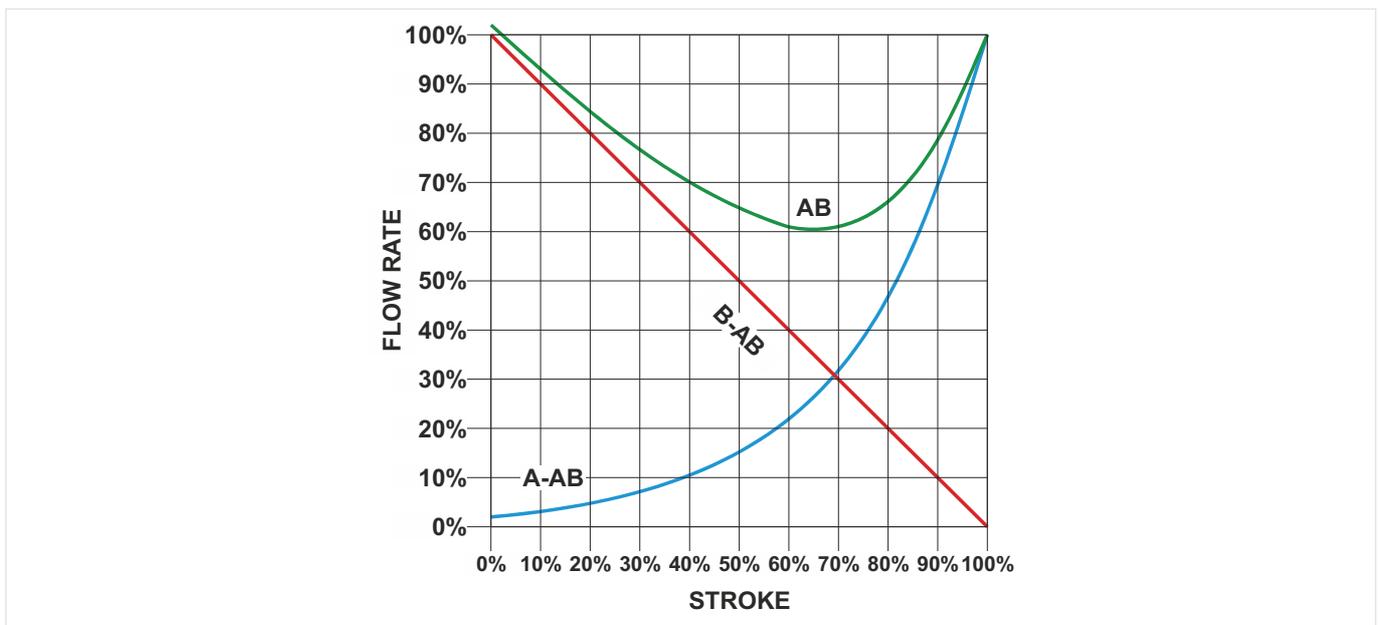

- Do not install valve with stem below the horizontal
- Fluid flow must correspond with the arrow direction on the valve body
- The installation of a strainer is strongly recommended

XE32B16

Valve type	3-way linear valve
Medium type	water or water-glycol mixture according to VDI 2035
DN size	32 mm
Kvs value	16
Media temp.	2 ... 170 °C
Flow char.	mod.equal%
Nominal pressure	PN16
Materials	Valve body made of brass and stem made of Stainless steel
Stroke	20 mm
Pipe connection	External threads
Port connection	ext. thread flat sealing
Flow char. A-AB	equal percentage
Flow char. B-AB	linear
Action	Stem up to close port A-AB

Features

- Brass body with external threaded end connections (type XE)
- Brass body with internal threaded end connections (type XI)
- Low seat leakage rate
- Self-adjusting packing
- Accurate positioning to ensure state-of-the-art temperature control
- Constant total flow throughout full plug travel

V5013E1105

Valve series	V5013E
Valve type	3-way mixing
Medium type	water
DN size	32 mm
Media temp.	2 ... 170 °C
Kvs value	16
Flow char.	mod.equal%
Nominal pressure	PN16
Action to open	stem down
Close off pressure with 600N motor	700 kPa
Close off pressure with 1800N motor	1600 kPa
Materials	body brass, stem stainless steel, plug brass
Stroke	20 mm
Connection diameter	G2 inch
Port connection	ext. thread flat sealing
