## FIRE SAFETY MANAGEMENT POLICY

Kozloduy NPP EAD implements its Fire Safety Management Policy to ensure fire safety as part of the nuclear and general safety in the performance of the Company's activities.

### THE FIRE SAFETY MANAGEMENT POLICY AIMS AT ACHIEVING THE FOLLOWING OBJECTIVES:

- Effective protection of personnel and the production process from fire and combustion products
- Protection of nuclear facilities, nuclear material, and radioactive substances from fire and combustion products
- Preventing and/or limiting to the highest degree the risks of fire
- Improving the practical knowledge of staff in ensuring fire safety
- Maintaining the Management System consistent with the provisions of GSR Part 2 Leadership and Management for Safety, applicable legal and regulatory requirements, and accepted requirements of stakeholders.

### THE FOLLOWING PRINCIPLES UNDERLIE THE FIRE SAFETY MANAGEMENT IN THE COMPANY:

- Compliance with national fire safety legislation
- Sustaining and cultivating a strong fire safety culture
- Prevention of fires
- Quickly detecting and suppressing fires
- Limiting the spread of fires.

In implementing the Fire Safety Management Policy within the Company, the Management applies a set of engineering, technical, and organisational measures for 'in-depth fire protection'.

Kozloduy NPP EAD managers at all levels are committed to maintaining and improving fire safety performance, aligning and engaging personnel in contributing to the effectiveness of the Company's Management System.

The Fire Safety Management Policy is communicated to all the Company's employees and each and every one of them is responsible for the implementation of its principles in their efforts towards achieving the set objectives.
